

BMW BIKES.

For more than 70 years of bike history, BMW has been impressive with its high-quality and innovative models. The BMW Bike Generation IV, which was developed in cooperation with Designworks, continues this success story.

New to BMW Bikes are the high-quality 3T for BMW Gravelbikes. They were developed in collaboration with the Italian brand 3T and are available in two exclusive colour designs. These aerodynamically designed bikes stand out thanks to first-class technical equipment and state-of-the-art racing components.

Also new are the BMW front carrier for the BMW Active Hybrid E-Bike and the BMW Cruise Bikes as well as the compatible BMW bike basket.

All other BMW Bikes are still available.

Number of new collection items: 7.

Number of existing collection items: 14.

**Sheer
Driving Pleasure**

BMW BIKES.

QUICK OVERVIEW.

Key message: First-class design, innovative functions.

Target group: BMW drivers; self-confident, sporty women and men.

Price level: Upper medium and premium.

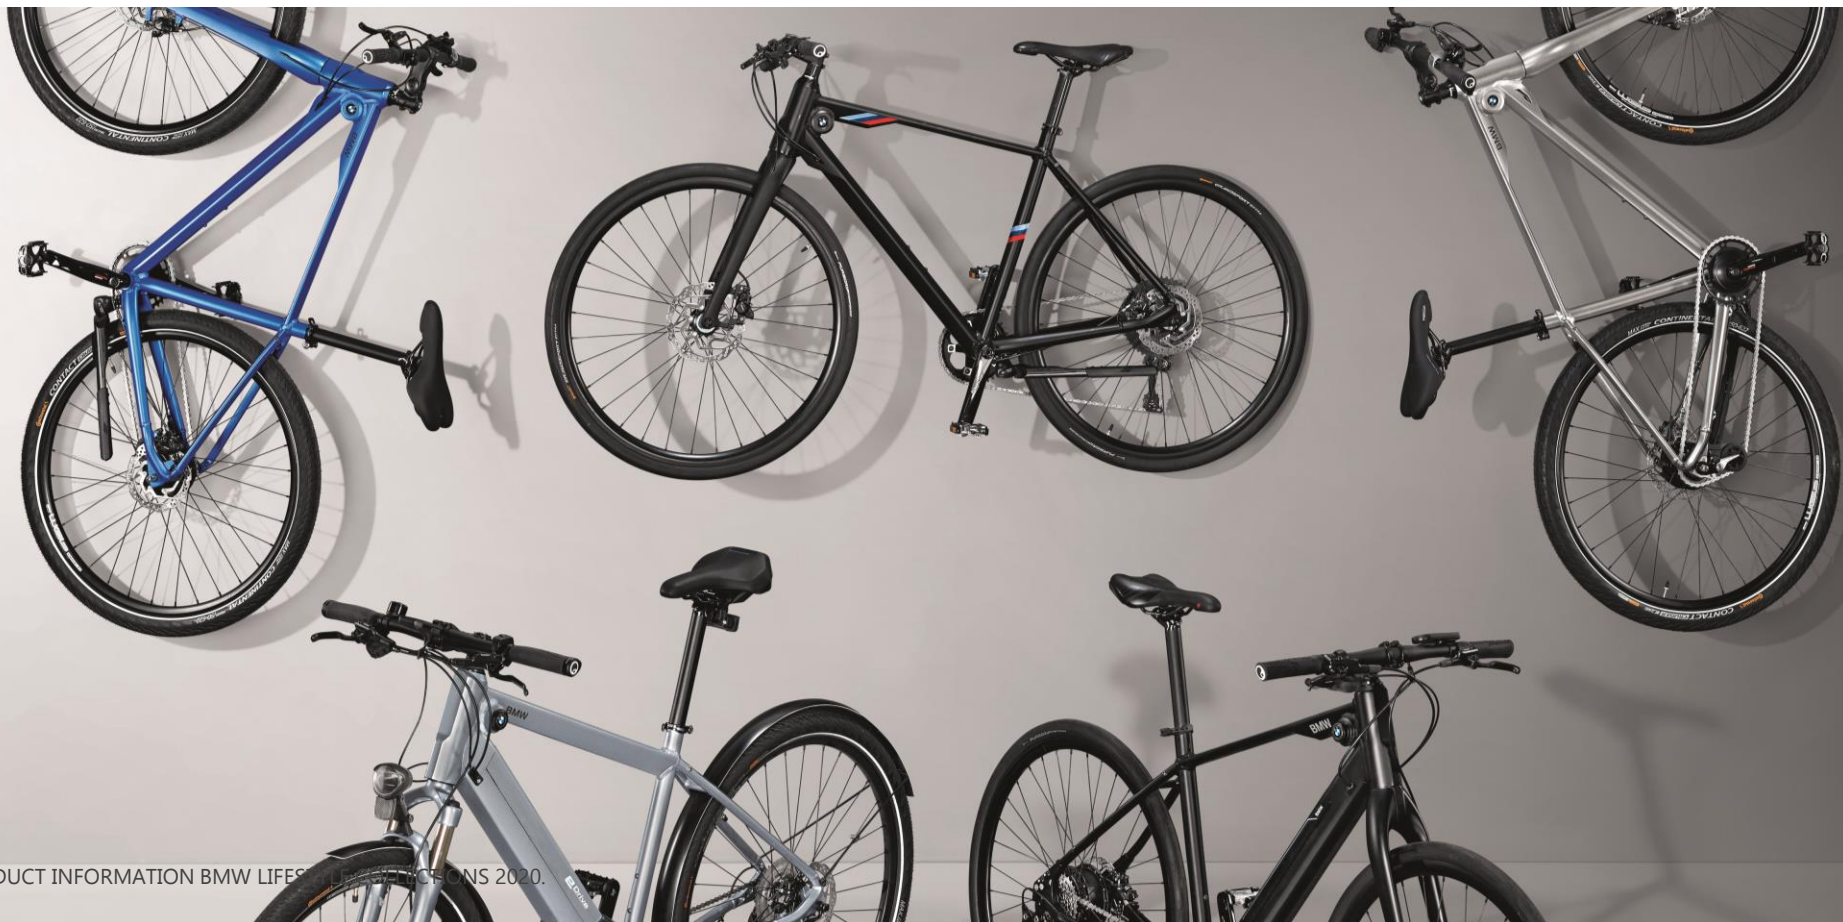

The successful sale of BMW Lifestyle products is based on product know-how and an understanding of target groups. It is therefore important that all those responsible internalise this product information. Pages not required in this document can of course be deleted.

Visual merchandising guide and communication packs.

In the media pool for you to download: The visual merchandising guide with concrete recommendations for product presentation and the communication packs with information on the communication materials.

BMW BIKES. DESIGN PHILOSOPHY.

DESIGN AND FUNCTION.

What we know from BMW vehicles can also be found in BMW Bikes. They enthuse riders not only with pure driving pleasure, but also with first-class design and innovative functionalities. The modern colour scheme, the linear frame shape with discreet BMW branding give the BMW Bikes an unmistakable urban look. The collaboration with 3T perfects the combination of unique design and innovative components.

Special themes of the collection:

BMW collaboration with 3T.

The collaboration with the Italian brand 3T sets standards. The gravel bike stands out thanks to its precise, minimalist design and state-of-the-art racing components. Clear lines and contours as well as the modern colouring make this bike unique.

The BMW M Bike.

The material mix of aluminium and carbon analogous to the BMW M vehicles gives this bike its sportiness. Due to the carbon fork specially developed for the bike, the weight of the bike could be reduced by a kilogram.

The BMW E-Bikes.

Stylish, clear form meets high tech: The BMW Active Hybrid E-Bike and the BMW Urban Hybrid E-Bike feature powerful drive units that blend seamlessly into the slim frame. Both E-Bikes are equipped with an innovative LED battery-charge indicator.

The BMW Cruise Bikes.

The unmistakable design inspired by the fixie trend and the high-quality components of the BMW Cruise Bike create the unique BMW experience even when biking.

BMW BIKES.
